Profile

Innovative **Computer Science Student** leveraging advanced **OOP & Data Structures** to build scalable software. With a unique blend of expertise in **Automation** and **3D Game Development (PlayCanvas)**, I translate complex logic into functional applications. Previously served as a **Technical Team Lead**, guiding peers to deliver high-quality **Java projects** and interactive web modules

Education

Bachelor of Science in Computer Science (BSCS) , <i>Sukkur IBA University</i> • Current Status: 6th Semester • CGPA: 3.0 (up to 5th Semester)	2023 – 2027 Sukkur
Intermediate (HSSC) , <i>Govt Islamia Science College Sukkur</i> • Subject: Computer Science • Percentage: 79%	2020 – 2022 Sukkur
Matriculation (SSC) , <i>Saint Mary's High School Sukkur</i> • Percentage: 93%	2019 – 2020 Sukkur

Skills

Technical Skills — Proficient • Programming Languages: C++, Java, Python, JavaScript. • Game Development: PlayCanvas (3D Web Games), Game Logic & Physics. • Web Development: HTML5, CSS3, DOM Manipulation. • Automation & Data: Data Scraping, PDF to Excel Conversion (Python/Pandas/Numpy). • Core Concepts: Programming Fundamentals, OOP, Data Structures & Algorithms (DSA), API Integration	Soft Skills — Competent • Analytical & Critical Thinking: Analytical Problem Solving / Logical Reasoning • Attention to Detail: Quality Focus • Technical Leadership & Mentorship: Team Leadership / Mentorship / Project Coordination • Adaptability & Rapid Learning: Quick Learner
---	--

Projects

Sphere Parkour Game , <i>(PlayCanvas)</i> • Developing a high-fidelity 3D browser-based parkour game using PlayCanvas and JavaScript. • Implemented complex physics for sphere movement environment (Space) • Successfully released a playable 3-level demo module to gather user feedback	2025 – 2026
---	-------------

PDF to Excel Data Scraper, (Python) Engineered a Python-based automation tool to extract data from scanned PDF documents	2025 – 2025
Hand Gesture Control Particle System, (Python) - Created an interactive web-based 3D particle system controlled via real-time hand gestures. - Integrated computer vision libraries to detect hand movements and manipulate visual elements dynamically	2025 – 2025
Offline Music Player, (Java) - Built a desktop media application using Java with a user-friendly graphical interface. - Implemented core features including file loading, playlist management, and playback controls	2024 – 2024
2D Space Shooting Game, (C++) Developed a classic arcade-style shooter game featuring collision detection, enemy AI, and scoring systems	2023 – 2024

Certificates

Programming Team Lead (1 Year) "I received a Certificate of Appreciation for serving as the Team Leader of the Programming Team, awarded by the Head of the Computer Science Department	3rd Position, C++ Coding Competition Achieved 3rd place out of 110 participants in a competitive algorithmic programming contest	STS (BPS 5-15) Secured 70 marks in the STS (BPS 5 to 15) recruitment test
